

Board Report July 2022 Achievement & Leadership

Conference Center Updates (from Candy Bores)

New cables are being pulled in each room. We will have 60 new speakers going into MOCC. There will be new digital projectors in each area; images can electronically be shown in any room on this listing.

- 3 digital projectors in President
- 3 digital projectors in Inventor
- 4 digital projectors in Artist
- 1 digital projector in the Lobby with a sound bar

There will be 14 wall jacks that will each have an HDMI and sound out jack – no longer need AV boxes and microphone to connect. We will have 7 handheld and 7 lapel microphone receivers in the ceiling and the new microphones will be using rechargeable batteries. Sound can be sent to any room on the listing. Output jack for GOAL/RockSolid and others to connect to the sound is being installed

There are still a few delays in equipment

New Administrative Assistant

Susan James has been hired to fill the new administrative assistant position. She will be covering the main office two days a week (and when coverage is needed), work with Candy in the conference center, and assist in the print shop.
