

Occupational Therapy Intent to Provide Fieldwork Placement

The University of Mount Union is pleased to share that we are developing a Master of Science in Occupational Therapy program and are currently in the applicant stage of program accreditation with the Accreditation Council of Occupational Therapy Education (ACOTE). In order to continue through the accreditation process, developing occupational therapy programs are required to identify fieldwork site partners that align with program outcomes and can provide initial level II fieldwork experiences. We appreciate the consideration to support our program and students and request that this support is demonstrated by completing the Intent to Provide Fieldwork Placement(s) information below.

Please indicate the number of fieldwork placements that you intend to support during the following experiences:

The exact dates of the fieldwork placements will be made available approximately 12 months prior to the fieldwork start date. Confirmation and additional fieldwork support information will be provided at that time. In the case that a fieldwork educator or site is unable to support the intended placement(s), alternative arrangements will be made by the occupational therapy program.

Thank you again for your support and your contributions to the OT profession. Should you have any questions, feel free to contact me.

Sincerely,
